EXPERIENCE

UBS **March 2024 – Present**
Data Scientist *Zurich, Switzerland*

- Develop and maintain production ML analytics workflows for execution data, including Python services/scripts and Airflow orchestration for fixed income and equities.

IBM Research **November 2023 – January 2024**
Machine Learning Intern *Zurich, Switzerland*

- Implemented Physics-Informed ML components for climate modeling, integrating constraint losses into training pipelines and maintaining reproducible experiments.

ETH Zurich **October 2023 – January 2024**
Machine Learning Researcher *Zurich, Switzerland*

- Built GPINN models in PyTorch, developing end-to-end training/evaluation code and utilities for dataset handling and experiment tracking.

ETH Zurich **February 2023 – July 2023**
Python Software Developer Research Assistant *Zurich, Switzerland*

- Built reusable Python modules and Jupyter-based tools for interactive learning and data visualization, with clear documentation and maintainable code structure.

EDUCATION

ETH Zurich **March 2021 – September 2023**
M.Sc. in Mechanical Engineering *Zurich, Switzerland*

- **Thesis**: Flow Reconstruction using Physics-Informed and Geometric Deep Learning

Politecnico di Bari **September 2017 – July 2020**
B.Sc. in Mechanical Engineering (Grade: 110/110) *Bari, Italy*

PUBLICATIONS

Flow Reconstruction in Time-varying Geometries using Graph Neural Networks **November 2024**
arXiv preprint: https://arxiv.org/abs/2411.08764

- Applied Geometric Deep Learning for fluid dynamics, demonstrating improvements in flow prediction accuracy and computational efficiency.

PROJECTS

OstuniHelper – AI Tourism Assistant **February 2025 – Present**
ostunihelper.it

- Built a full-stack tourism assistant using a RAG-based multilingual AI model, with a JavaScript frontend, Flask backend, and MySQL database.

Numerical Investigation of Momentum Injection for High Lift Wing **March 2022 – July 2022**
Semester Project at ETH Zurich

- Developed and validated CFD-based numerical models under supervision of Prof. Patrick Jenny, resulting in enhanced aerodynamic lift performance.

TECHNICAL SKILLS

Languages: Python, C++, SQL, JavaScript
ML/AI: PyTorch, TensorFlow, Scikit-learn, Deep Learning (Transformers, GNNs), Statistics & Optimization
Data & HPC: NumPy, Pandas, Jupyter, CUDA, Multi-GPU (PyTorch DDP)
Software: Docker, Git, Flask, REST APIs, Nginx/Gunicorn, Full-Stack Development
